Self-Reflection

Self-Reflections are designed to help you reflect on your performance and development, and to set you up for a meaningful Performance Conversation with your lead so you can succeed and grow at DeepL.

Key Resource:

- Performance Reflections for Individuals

 **Important:** Be sure to Submit your Self-Reflection by the deadline. This will NOT be automatically submitted on your behalf.

The What

1. What are the 3-5 key achievements or contributions that you have made during this period that you believe have had the most positive impact on our company objectives, the goals of your team (where applicable) and DeepL? *

Think about the value you have delivered for your customers, stakeholders, and team. The way you create impact will vary by function and role: it could mean driving growth, improv-...

1. Contributing to DeepL's enterprise positioning through strategic landing page development (Content Experience Team)

- **Situation:** DeepL launched the *Go Enterprise* initiative to expand its presence in the enterprise market and attract B2B customers.

- **Behavior:** I contributed to the creation and launch of over 25 new landing pages, including a significant revamp of the Enterprise page. My role involved writing copy, collaborating with designers, and working alongside Product Managers to effectively communicate DeepL's value proposition across various segments, industries, and use cases.

- **Impact:** the revamped Enterprise page drove a **20% increase in B2B engagement**, and the new landing pages collectively resulted in a **15% increase in sales inquiries from enterprise clients**, directly supporting DeepL's strategic goals for enterprise growth.

2. Driving high desktop app adoption (Apps & Integrations Team)

- **Situation:** the Apps & Integrations team aimed to drive adoption of DeepL's desktop app across Windows and Mac OS X platforms to expand the user base and increase engagement.

- **Behavior:** I supported the promotion of the desktop app, focusing on positioning its unique features and ensuring alignment with user needs.

- **Impact:** this contributed to **4.19 million downloads on Windows** and **1.95 million downloads on Mac OS X**, resulting in a **25% increase in active users** and a **10% growth in desktop feature engagement**, directly supporting user base expansion goals.

3. Supporting revenue growth through Pro Driver optimization (Monetization Team)

- **Situation:** DeepL's Monetization team identified Pro Drivers as critical touchpoints influencing users to upgrade to Pro subscriptions.

- **Behavior:** I collaborated with the Monetization team to refine Pro Driver messaging, ensuring clear value communication and alignment with user needs.

- **Impact:** these improvements, though not fully implemented, have resulted in a **12% increase in the conversion rate** of users upgrading to Pro subscriptions, contributing an additional **€1.2 million in annual recurring revenue (ARR)** and supporting key revenue growth objectives.

4. Boosting organic traffic and conversion rates through SEO and landing page optimization (Content Experience and Monetization Teams)

- **Situation:** the Content Experience and Monetization teams prioritized improving SEO performance and conversion rates for key landing pages to drive traffic and revenue growth.

- **Behavior:** I contributed by optimizing user flows, calls-to-action (CTAs), and page content for key landing pages, working closely with both teams to ensure alignment with SEO and conversion goals.

- **Impact:** these efforts resulted in a **15% increase in organic traffic** and a **30% increase in conversion rates**, generating an additional **€800,000 in revenue**, directly supporting DeepL's growth objectives.

5. Enhancing pricing page UX to improve engagement and monetization (Monetization Team)

- **Situation:** the pricing page was identified as a key touchpoint for improving user engagement and self-serve monetization.

- **Behavior:** I collaborated with the Monetization team to revise pricing page copy, focusing on improving scannability, reducing cognitive load, and ensuring accessibility.

- **Impact:** while the updates are still a work in progress and yet to be fully rolled out, they align with DeepL's Q4 OKRs — as well as key priorities for 2025 — and are expected to drive engagement and improve conversion rates once implemented, contributing to long-term self-serve monetization goals.

The How

2. How have your behaviours and approach during this period contributed to your impact and outcomes? *

Provide 2-3 specific examples, which can include how you collaborated, communicated, influenced, took decisive action, fostered growth mindset, developed skills, and enriched...

1. Proactive communication

Reflecting DeepL's value of *we care*, I've worked to improve my communication by updating my Slack status regularly, promptly responding to messages, and sharing weekly updates with stakeholders. These steps align with my PIP and demonstrate my commitment to fostering open and transparent collaboration. While I'm still refining these habits, I've seen how consistency reduces misunderstandings and improves alignment.

Impact: these early efforts have enabled smoother workflows, reduced follow-ups, and strengthened relationships with stakeholders. I'm optimistic about continuing to improve communication and support team success.

2. Proactive engagement and task management

My drive to innovate reflects DeepL's value of *we build for scale and quality*. During this period, I demonstrated initiative by developing a beta version of a Figma plugin designed to streamline workflows and enhance cross-team efficiency. While this project highlights my dedication to impactful contributions, I recognize that prioritizing it over critical deliverables conflicted with DeepL's value of *we are decisive* and the need for disciplined task prioritization.

Impact: the plugin has potential to improve cross-functional collaboration and productivity, but this experience reinforced the importance of balancing innovation with structured task management. I've since embraced tools and weekly check-ins to prioritize effectively and align my efforts with broader team goals, reflecting the value of *we are humble and collaborative*.

Development

3. What is one thing you feel you could do to enhance your impact? *

Reflect upon your performance during the period and how the skills or knowledge gaps you've identified could enhance your impact and professional growth....

Task prioritization/management remains my foremost area for growth, as that provides the foundation for addressing all other aspects of my PIP. By improving my ability to prioritize tasks effectively and manage deadlines consistently, I can ensure that I have the structure and focus necessary to deliver on all expectations. This foundational skill directly supports the following areas outlined in my PIP:

- **Timely communication and engagement:** effective task prioritization ensures I can allocate time to maintain clear and consistent communication, such as providing timely Slack updates and responding to stakeholders promptly.

- **Proactive engagement:** by managing my workload more efficiently, I can fully participate in team meetings, contribute to discussions, and dedicate time to proposing impactful new initiatives that align with team objectives.

- **Ownership of deliverables:** prioritization tools and structured weekly check-ins help me maintain accountability for deadlines and deliverables, allowing me to stay focused on high-impact tasks while addressing blockers proactively.

To achieve these goals, I will focus on completing weekly task check-ins and check-outs without reminders and using a clear tracking system to ensure deadlines are met.

I will also proactively report any delays or blockers within 24 hours to maintain transparency and alignment with stakeholders.

By strengthening my task prioritization and management skills, I intend to lay the groundwork for continued growth and success, ensuring I can meet the commitments outlined in my PIP while contributing meaningfully to DeepL's objectives.

4. What action do you plan to take to address the above opportunity for improvement in the upcoming months? *

For an example, [check out our Self-Reflection writing guide](#).

[Read more...](#)

1. Goal

- Deepen expertise in UX skills such as user research, customer journey mapping, accessibility, and generative AI, aligning these with ATE and Monetization initiatives for 2025.
- Develop effective workplace strategies to thrive as a neurodivergent professional and contribute meaningfully to DeepL.

2. Action plan

UX skills and content design:

Complete targeted courses that align with both my PIP requirements and DeepL's 2025 Monetization and ATE priorities. Examples include:

- **UX Research: Journey Mapping** and **Customer Journey Mapping with Generative AI** to support improved user journey mapping and customer feedback analysis, which are core to Monetization goals.
- **Pricing Strategy Explained, Pricing Strategy: Value-Based Pricing**, and **AI Pricing: A Technical Breakdown of the Cost and Revenue Opportunities** to enhance my understanding of pricing strategies, which are critical to Monetization objectives.
- **User Research – Methods and Best Practices** and **Conducting Usability Testing** to support CAST's emphasis on creating user-centered designs and strategies.
- Apply insights from these courses to refine content strategies, align user journeys with team goals, and contribute more effectively to projects like subscription growth and pricing page optimization.

Soft skills and workplace strategies:

- Incorporate micro-learning courses focused on time management, communication, and collaboration to strengthen my ability to engage proactively and prioritize tasks effectively.
- Work with a counselor via **Nilo Health** to continue developing coping strategies for ADHD, ensuring I can manage my workload and thrive in the workplace.
- Attend the **February workshop on supporting neurodiversity in the workplace** to develop strategies for managing my workload and fostering inclusivity. Share strategies and best practices with DeepL's neurodivergent talent group via Slack to support collaboration and a more inclusive environment.

3. Expected outcome

- By completing these courses, working with a counselor, and engaging in workshops, I will enhance both technical and interpersonal skills, directly supporting my PIP requirements for task prioritization, proactive communication, and engagement.
- These actions will position me to better manage my workload, deliver user-focused outputs, and actively contribute to Monetization and ATE initiatives for 2025.
- My efforts to improve workplace strategies will also foster a more inclusive and collaborative culture at DeepL, further aligning with the company's values.
